

SHAREPOINT DEVELOPMENT SERVICES

Flexible support, custom solutions.

CUSTOM SHAREPOINT DEVELOPMENT

Microsoft SharePoint is used by organizations across industries to share and manage content, knowledge, and applications to empower teamwork, quickly find information, and seamlessly collaborate across the organization.

Its extremely open platform allows for powerful customization, often more than users can easily achieve. Our SharePoint Development Services help organizations customize and implement their SharePoint instance with flexible support models. Our consultants focus on these dimensions:

- **User Experience:** Understanding your user groups are key to success. We will partner with you to evaluate and understand how users interact with your instance to design components.
- **Custom Development:** Leveraging modern frameworks and best in class design capabilities, UDig consultants will develop the best solution for your Organization's needs. We mix state-of-the-art front end web development with the inherent capabilities of SharePoint to provide you much richer experiences than out of the box can provide.

OUR SHAREPOINT SERVICES

- **Design:** Our UI/UX designers work closely with your users to build out work flows and experiences that match the imagination. We want you to love your platform and feel satisfied doing your day to day work.
- **Delivery:** Our engineers have the skills to code custom solutions on top of your SharePoint instance leveraging its built-in features without the limitation of the basic WYSIWYG components.
- **Support:** Don't worry we have you covered. We shape a management agreement to fit your needs, keeping things running smoothly while providing additional, ongoing delivery needs so your work space never feels stale or outdated.

FLEXIBLE SUPPORT MODELS

Depending on the size of your organization and complexity of your projects, we offer pricing models and service level agreements to best meet your needs. On demand, ad hoc or project based models are available to provide you with the elastic, cost-effective solution best for your situation.

REQUIREMENTS

Sponsor: This person provides guidance and an escalation point, should one be necessary. The sponsor also serves as the ultimate sign-off authority for the consulting engagement.

Stakeholders: These people are your IT and business partners who provide UDig with the relevant and necessary information about your SharePoint instance and business requirements.

Technology: Sharepoint online instance.

ABOUT UDIG

We help companies turn big ideas into actionable plans and measurable results. By providing a practical, technology agnostic approach to projects centered around Digital, Data and Engineering initiatives, we connect strategy with solutions that work.

Our diverse team of experts is small enough to provide personal service, yet large enough to execute enterprise initiatives. Based in Richmond, VA our footprint covers the Mid-Atlantic region with consultants engaged on client sites across the country.
